Office Action Summary	Application No. 10/719,850	Applicant(s) SCHMITT, BARBARA K.	
	Examiner Arthur L. Corbin	Art Unit 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2007 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, 10, 11, 14, 18, 19, 21-26, 28, 29 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al (6,632,468). Morgan et al is described on pages 4-7 of the August 15, 2006 Office action. With regard to claims 8 and 26, applicant is referred to paragraph no. 23 on page 6 of said Office action. Additionally, the product in Morgan et al includes 15-80% water. Although Morgan et al does not specifically disclose that the food product is "suitable for" releasing steam when heated in a microwave oven, it would have been obvious to the skilled artisan that the food product in Morgan et al is so suitable since microwave heating typically occurs at a temperature higher than the boiling point of water, of which Morgan et al's product includes up to 80%. Further, since Morgan et al discloses the components in applicant's claimed mixture, if applicant's mixture is "suitable for" releasing steam

together with the claimed additives then so is the mixture used to prepare the product in Morgan et al, as said mixture includes applicant's claimed components.

4. Claims 9, 16, 17, 27, 34 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al as applied to the claims above, and further in view of Linford et al (2001/0043974) as set forth in paragraph nos. 24, 26 and 27 of said Office action and in paragraph no. 5, Paper No. 20070920.

5. Claims 12, 13, 15, 30, 31 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al as applied to the claims in paragraph no. 4 above, and further in view of Benson et al (4,297,942) as set forth in paragraph no. 25 of said Office action and in the last sentence of paragraph no. 5, Paper No. 20070920.

6. Applicant's arguments filed October 31, 2007 have been fully considered but they are not persuasive. Although Morgan et al does not contain a recitation that the mixture therein is "suitable for" releasing steam upon being heated in a microwave oven, as applicant contends, this property of said mixture is clearly obvious, as set forth above. Although the reason for this obviousness is not present in a reference of record, as applicant "seasonably challenges", the obviousness is based upon general knowledge of the skilled artisan, the reliance upon which is clearly permissible in accordance with the recent U.S. Supreme Court decision KSR International Co. v. Teleflex Inc..

7. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE**

FINAL even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
